

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

Claim 1 (currently amended): A circuitry assembly, comprising:

- a plurality of first electric wires, forming a first wire group;
- a plurality of second electric wires, intersecting the first electric wires, while forming a second wire group;
- a first insulative sheet, disposed between the first wire group and the second wire group;
- and
- a wiring member, which holds both of the first electric wires and the second electric wires.

Claim 2 (original): The circuitry assembly as set forth in claim 1, wherein the first insulative sheet is formed with at least one opening located corresponding to at least one intersecting point at which one of the first electric wires and one of the second electric wires are electrically connected.

Claim 3 (original): The circuitry assembly as set forth in claim 1, further comprising a second insulative sheet, disposed between the wiring member and the second wire group.

Amendment Under 37 C.F.R. § 1.111  
Serial No. 10/608,196  
Sughrue Ref: Q76318

Claim 4 (original): The circuitry assembly as set forth in claim 3, wherein the second insulative sheet is formed with a plurality of grooves which respectively receive the second electric wires.

Claim 5 (original): The circuitry assembly as set forth in claim 1, wherein the first insulative sheet is provided as a flexible film.

Claim 6 (original): The circuitry assembly as set forth in claim 1, wherein the first insulative sheet is comprised of either polyethylene terephthalate or polyethylene naphthalate.

Claim 7 (original): The circuitry assembly as set forth in claim 1, wherein at least one of the first electric wires and the second electric wires is plated with tin.

Claim 8 (original): The circuitry assembly as set forth in claim 1, wherein the wiring member is formed with a plurality of grooves each partly holding one of the first electric wires or one of the second electric wires.

Claim 9 (original): An electric junction box, comprising:  
a casing body, in which the circuitry assembly as set forth in claim 1 is accommodated;

Amendment Under 37 C.F.R. § 1.111  
Serial No. 10/608,196  
Sughrue Ref: Q76318

a first terminal, to which each one of the first electric wires held by the wiring member is press-fitted to be electrically connected therewith; and

a second terminal, to which each one of the second electric wires held by the wiring member is press-fitted to be electrically connected therewith.

Claim 10 (original): The electrical junction box as set forth in claim 9, further comprising a cover, formed with a plurality of grooves which respectively receive the first electric wires.
